

What makes Tombow Xtreme different than the other glues on the market?

Tombow Xtreme is a high-performance adhesive not only for Craft, but for School and home projects too. It works with hard-to-glue surfaces such as cork, burlap, plastic, metal, ceramic, fabric, foam, wood, rubber and, of course paper of all thicknesses. It has a super strong hold and is 5X stronger than standard tape runners...it is very economical to use.

Is the glue non-toxic?

Yes.

Is it acid free?

Yes.

How long does it take to dry?

Immediately, but it continues to become stronger after 24 hours. This adhesive is 5X stronger than any standard tape runners so for best results when working with Tombow Xtreme, roll to apply the tape and swipe the tip to either side before lifting for a clean application.

Permanent or Re-positionable?

Tombow Xtreme is Permanent!

How do I glue down ribbon?

If you apply wet glue to fabric it will bleed through, but not with the Tombow Xtreme Adhesive, which adheres ribbon to paper without bleeding.

Any tricks for using Tombow Xtreme?

For best results, roll to apply the tape and swipe the tip to the side before lifting for a clean application.

What are some of the techniques you can create with Tombow Xtreme?

The techniques are endless; ruffled ribbon, pleated paper, creating embellishments, etc! Go to Tips and Techniques for project ideas!

Is the Tombow Xtreme refillable?

Yes and the refills are easy to install!

Is Tombow Xtreme safe to use on Photos?

Yes, Tombow Xtreme is PAT (Photographic Activity Test) approved.

Can I use Tombow Xtreme to mount materials such as fabric, papers or photographs on a display board?

Yes, Tombow Xtreme can be used to glue fabrics, papers, photographs, wood, etc. to display boards. (See the list of suggestions of gluing surfaces below)

Project Ideas:

- Kids Craft and School Projects
- Office Space Solutions
- Art Framing and Matting Projects
- Wrapping and Packaging Projects
- DIY Projects
- Craft and Scrapbooking Projects

Acrylic Based, won't stain or bleed. Tombow Xtreme Adhesive continues to strengthen with final cure time in 24 hours.

Suggestions of gluing surfaces using Tombow Xtreme. These surface should be lightweight as very heavy object and physical stresses may cause the separation of surfaces:

- Fabric:
 - *Heavy fabric:* burlap
 - *Lightweight fabric:* cotton ribbon, double sided satin, trim, lace
- Synthetic materials:
 - Plastic
 - Foam
 - Vinyl
 - Rubber
 - Felt
 - Buttons
- Natural Materials:
 - Cork
 - Metal coin
 - Textile
 - Leather
 - Wood
 - Feathers
- Glass
- Mirror
- Paper:
 - Carton, Cardboard, Chipboard, Paper Flowers,

Not all surfaces will glue the same as several factors could contribute to weakening the surfaces....such as sunlight, heat, solvents and physical stresses may also cause the separation of surfaces.
